

Sumukesh Reddy Mopuram

B.Tech (CSE), Indian Institute of Information Technology, Sri City

+91-8790787664 | sumukeshreddy.m23@iiits.in | LinkedIn | GitHub | LeetCode (**Knight**) | Portfolio

Professional Summary

Software Engineering undergraduate with strong foundations in **Data Structures, Backend Systems, and Deep Learning**. Experienced building scalable full-stack applications with **Node.js, Spring Boot, and AWS**, and implementing transformer-based models for hyperspectral image classification and semi-supervised learning research.

Education

- Indian Institute of Information Technology, Sri City** 2023 – Present
B.Tech in Computer Science and Engineering CGPA: 8.16/10

Experience

- Software Engineering Intern – Infosys Springboard** Feb 2026 – Apr 2026
Spring Boot, React, REST APIs, MySQL, JWT
 - Built an end-to-end **Web-Based Coffee Ordering Platform** with multi-role workflows (admin, staff, customer).
 - Designed and implemented **RESTful APIs** for bookings, orders, and payments; integrated with a React frontend.
 - Implemented **JWT authentication**, email verification, and relational DB schema focused on data integrity.

Projects

- Prioritized Semi-Supervised Deep Embedded Clustering** Dec 2025 – Present
PyTorch, Deep Learning, Semi-supervised Learning, Clustering
 - Implementing a semi-supervised clustering model using **prioritized pairwise constraints** to improve latent representation learning.
 - Applied distance-based priority weighting to constraints; experimenting with improved loss strategies and optimization techniques.
- Hyperspectral Image Classification using GSC-ViT** [GitHub] Jan 2026 – Apr 2026
PyTorch, Vision Transformers, Remote Sensing, Indian Pines Data Set, Salinas Data Set
 - Implemented a lightweight **Groupwise Separable Convolutional Vision Transformer (GSC-ViT)** for hyperspectral image classification.
 - Designed a spectral-spatial learning pipeline combining **groupwise separable convolutions and transformer attention blocks**.
- ShelterSeek – Accommodation Platform** [Live] [GitHub] Jan 2025 – Present
Node.js, Express.js, MongoDB, AWS
 - Built a full-stack platform with role-based access, admin verification, secure backend APIs, and optimized DB queries.
 - Owned end-to-end backend development, AWS deployment, and production bug fixes.
- VachoLink – Real-Time Messaging App** [Live] [GitHub] Nov 2025 – Present
React, Node.js, MongoDB, OAuth 2.0, JWT
 - Implemented real-time chat with OAuth-based authentication, scalable REST APIs, and reliable session management.
- Cloud Monitoring Pipeline** Sep 2025 – Dec 2025
AWS Lambda, CloudWatch, Python
 - Built a serverless log monitoring and alerting system on AWS with event-driven architecture and low operational overhead.

Skills

- Languages:** C, Java, Python, JavaScript
- Backend & Web:** Node.js, Express.js, React, REST APIs, Spring Boot
- Deep Learning & AI:** PyTorch, CNNs, Vision Transformers, RNN, LSTM, Transformers, NLP, Semi-supervised Learning, Clustering
- Databases:** MongoDB, MySQL
- Cloud & Tools:** AWS (EC2, Lambda, CloudWatch), Docker, Git, GitHub
- Core CS:** Data Structures & Algorithms, OOP, Operating Systems, DBMS

Positions of Responsibility

- Contest Manager – Gradient (Programming Club, IIITS)** 2025 – Present
Planned and managed competitive programming contests, ensuring smooth execution and participant engagement.

Strengths

- Solved **700+ DSA problems** on LeetCode and other platforms (Codolio); strong debugging skills across unfamiliar codebases.
- Hands-on experience implementing research papers and experimental deep learning models.
